

DISCDYEADDICT'S DISC DYE GUIDES

SHAVING CREAM BURST EFFECT

SUPPLIES

- Premium Plastic Disc - preferably white
- Water & Dish Soap to wash disc
- Prochem Dye Powder
- Shaving Cream (whatever is on sale)
- Q-Tips
- Dish to place disc in (it will spread over the edge)
- Tray or something underneath to catch the dye powder around the dish
- Old gift or something to smooth the surface
- Optional: spray bottle with water in it

1

PREP

- Wash the disc before dyeing
- Remove factory film/finish that can prevent dye from absorbing
- Make volcano-shaped mound of shaving cream, about 5 inches tall in the center of the dish
- Use gift card or spoon to smooth out the surface

2

3

SPRINKLE

- Carefully take a QTip and dip it in your dye powder
- You do NOT need a lot
- Hold the QTip over the shaving cream mound and tap to make a faint straight line of dye powder down from the top-middle to the outside

REPEAT

- Repeat as much as you want
- A little dye goes a LONG way
- Think about which colors mix together to make other colors, and be careful (or not) when sprinkling them near each other

4

5

DROPPED TOO MUCH

- Don't worry if you dropped too much. Just know that will create a larger spot or streak on the disc
- You don't "need" to cover the whole disc
- Optional: Spray mound with water to activate (i never do this, but some people do)

PLACE DON'T PUSH

- When you've finished dropping your dye powder to your liking...
- Place the disc CAREFULLY on the top of the mound.
- DO NOT drop/push it

6

DISCDYEADDICT'S DISC DYE GUIDES

SPINYANG (continued)

GRAVITY

7

- Now we let Gravity do the hard work
- Gently let go of the disc, and as it settles into the shaving cream, rotate it around in one direction
- This will DRAG the dye across the disc in a circular pattern
- Rotate half-way but not more than half-way

Rotated

Not rotated as much

SETTLE

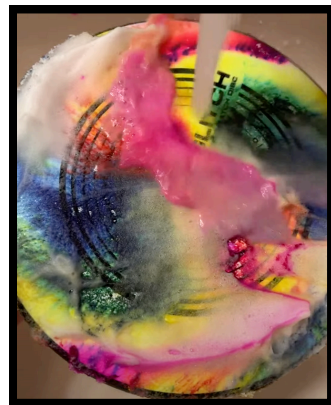

8

- Don't touch the disc again for 24 hours
- Over the next 24 hours, the disc will settle ALL the way down into the shaving cream
- This PUSHES the dye to the outside of the disc
- If you rotated the disc, it will have a circular burst
- If you didn't rotate the disc, it will be more of a straight burst pattern

9

WAIT + WASH

- Let the disc sit in the shaving cream for 24 hours NO HEAT
- Remove the disc from the shaving cream and wash in warm water QUICKLY
- Do not let the dye touch the underside of the disc if you dont want it to stain (for example)

FINISHED

10

- That's it.
- That's all it takes to do a shaving cream burst pattern dye
- It's the cheapest, easiest method
- Last Tip: BE CAREFUL as the dye powder will catch any air current and fly off onto your carpet and stain it if it gets any moisture
